- 1) Prior to heating the branding tool, coat the face with non-stick cooking oil.
- 2) Plug in the branding tool and allow to sit for about 15 minutes in order to get to the top temperature.
- 2) Apply the tool quickly & directly to the food with light pressure. Do not brand raw foods.
- 3) Brush the tools' face with a soft wire brush between brandings.
- 4) Treat this tool with the same care & caution as your cooking surface.
- 5) DO NOT pour water on the tool to cool it. Allow it cool off naturally.
